Working Papers

2025 **Signaling in Informal Contracts-A Field Experiment in Volunteer Management**, *single author*, (draft in preparation)
Abstract: I conducted a field experiment ($n = 683$) at a large-scale event to evaluate signaling mechanisms in volunteer management. I find that formal commitment significantly reduces no-shows and late cancellations but decreases overall shift completion. Conversely, trust-based signals do not affect no-show rates but improve organizational efficiency by fostering earlier cancellations. These results demonstrate the strategic trade-offs between mandatory confirmation and relational signaling.
